Recent graduate with a passion for web development seeking an entry-level position in a dynamic environment to deliver leading-edge solutions utilizing strong interpersonal, time management, and problem-solving skills. Proficient in HTML5, CSS/Sass, JavaScript, Node.js, and SQL, with a solid understanding of REST APIs and widely used web frameworks like React and Next.js. Dedicated to staying updated with advancements in AWS cloud technology.

PROFESSIONAL EXPERIENCE

QUEEN OF MY UNIVERSE

Studio Web Developer

Melbourne, AU

March – November 2022

- Co-led team to develop a responsive **WordPress** website and content platform for a Melbourne-based business, elevating online presence and driving user engagement.
- Established modifications in **Yoast SEO** plugin to enhance on-page optimization, including meta tags, keyword optimization, and **XML** sitemap generation, resulting in a **25%** increase in organic search traffic.
- Utilized **WP-Optimize** plugin to optimize and clean up the WordPress database, improving website performance and scalability by reducing database load.
- Leveraged **UpdraftPlus** plugin to automate regular website backups and streamline restoration processes, ensuring minimal data loss and improved disaster recovery capabilities.

ATM ONLINE VN

Frontend Developer

Ho Chi Minh, VN

January – March 2022

- Developed and maintained an in-house website using **HTML5**, **CSS / Styled Component**, **React**, and **Typescript**, resulting in a **20%** increase in user engagement.
- Integrated authentication and authorization using **JWT tokens**, **Passport.js**, and **React Context API**, providing secure access control and personalized experiences in a multi-user web application.
- Employed testing framework using **Jest** with **React Testing Library** for more advanced utilities and render functions in unit tests, ensuring a **15%** reduction in bugs and code quality and robustness throughout the development lifecycle.
- Conducted manual and automated accessibility testing using tools such as **Axe**, **Lighthouse** and **React Accessibility Testing Library**, identifying and resolving accessibility issues in the application.
- Collaborated with backend developers to optimize **API calls** and reduce unnecessary data transfers, enhancing a **30%** improvement in performance and efficiency of React applications.
