

# PHUC LE

Junior React Developer  
Melbourne, Australia

[github.com/phucle-gin](https://github.com/phucle-gin) | [www.phucle.org](http://www.phucle.org) | [linkedin.com/phucnguyenhoangle](https://linkedin.com/phucnguyenhoangle) | [phucnh.le@gmail.com](mailto:phucnh.le@gmail.com) | +61423851354

A recent graduate with a passion for web development and looking for an entry-level position in a fast-paced atmosphere to deliver cutting-edge solutions while demonstrating good interpersonal, problem-solving, and time management skills. Proficient in HTML5, CSS/Sass, JavaScript, Node.js, and SQL, as well as REST APIs and commonly used application interface workflows such as React and Next.js. Driven to stay current on AWS cloud technology breakthroughs.

## PROFESSIONAL EXPERIENCES

### QUEEN OF MY UNIVERSE

Melbourne, AU

Studio Web Developer

March – November 2022

- Co-led team to develop a responsive **WordPress** website for a Melbourne-based personal coach, utilizing **PHP**, **HTML5**, and **CSS** to ensure a visually appealing and user-friendly interface, elevating online presence and driving user engagement.
- Established modifications in **Yoast SEO** plugin to enhance on-page optimization, including meta tags, keyword optimization, and **XML** sitemap generation, resulting in a 25% increase in organic search traffic.
- Utilized **WP-Optimize** plugin to optimize and clean up the WordPress database, improving website performance and scalability by reducing database load.
- Leveraged **UpdraftPlus** plugin to automate regular website backups and streamline restoration processes, ensuring minimal data loss and improved disaster recovery capabilities.

### ATM ONLINE VN

Ho Chi Minh, VN

Software Developer

January – March 2022

- Troubleshooted and maintained an in-house website workflow using **HTML5**, **CSS / Styled Component**, **React**, and **Typescript**, resulting in a 20% increase in **UI** performance.
- Integrated authentication and authorization using **JWT tokens**, **Passport.js** while applying **Redux** for efficient handling state in **React Native** components, providing more secure access control.
- Employed testing framework using **Jest** with **React Testing Library** for more advanced utilities and render components in **unit tests**, ensuring a 15% reduction in bugs and code quality and robustness.
- Conducted automated accessibility testing using tools such as **Lighthouse** and **React Accessibility Testing Library**, troubleshooting and resolving accessibility issues in the application.
- Collaborated with backend developers to optimize Node.js API calls, reducing data transfers. This resulted in a well-structured React codebase while also achieving 30% faster loading times.
